

# John Franklin Crenshaw

jfcren@stanford.edu | jfcrenshaw.github.io

**Summary:** I am a KIPAC Rubin Fellow at the Kavli Institute for Particle Astrophysics and Cosmology. My research focuses on observational cosmology, large-scale structure, Lyman-break galaxies, photo-z estimation, weak lensing, active optics for wide-field telescopes, galaxy evolution, and AI for science.

## Professional Appointments

---

**KIPAC Rubin Fellow**, Stanford Univ. & SLAC National Accelerator Laboratory      Sept 2025 – present  
*Faculty Mentor: Pat Burchat*

## Education

---

**University of Washington**, MS, PhD in Physics      Sept 2019 – Jun 2025  
*Advisor: Andrew Connolly*  
*Thesis: Towards High-redshift Cosmology with Lyman-break Galaxies Detected by LSST*

**Duke University**, BS in Physics      Aug 2015 – May 2019  
*summa cum laude* with highest distinction  
*Advisor: Kate Scholberg*  
*Thesis: Sensitivity of the Helium and Lead Observatory to Core-Collapse Supernova Neutrino Bursts*

## Fellowships, Grants, & Awards

---

|                                                                  |             |
|------------------------------------------------------------------|-------------|
| KIPAC Rubin Fellowship (\$368,000)                               | 2025 – 2029 |
| NASA Euclid General Investigator Program, Science PI (\$480,000) | 2025        |
| Vera C. Rubin Observatory Builder Status                         | 2025        |
| LSST Dark Energy Science Collaboration (DESC) Builder Status     | 2025        |
| Dunlap Institute Workshop Grant (\$6,500)                        | 2024        |
| DOE Cosmic Frontier Grant, Contributor (\$360,000)               | 2023        |
| DOE SCGSR Fellowship (\$10,400)                                  | 2023        |
| Rubin Observatory ISSC Ambassador (\$4,500)                      | 2021 – 2022 |
| DOE Scholar (\$12,000)                                           | 2021        |
| Duke Faculty Scholar (\$10,000)                                  | 2018 – 2019 |
| Daphne Chang Memorial Award (\$1,000)                            | 2019        |
| DAAD RISE Research Exchange Fellowship (€ 5,000)                 | 2018        |

## Publications

---

As of January 2026, I have (co-)authored 14 papers, with a total of 120 citations and an h-index of 7.

### First and Second Author:

4. *Quantifying the Impact of LSST u-band Survey Strategy on Photometric Redshift Estimation and the Detection of Lyman-break Galaxies*  
**Crenshaw J. F.**, Leistedt B., Graham M. L., Payerne C., et al. (2025) ApJS 281 54
3. *Probabilistic Forward Modeling of Galaxy Catalogs with Normalizing Flows*  
**Crenshaw J. F.**, Kalmbach J. B., Gagliano A., Yan Z., et al. (2024) AJ 168 80
2. *Using AI for Wave-front Estimation with the Rubin Observatory Active Optics System*  
**Crenshaw J. F.**, Connolly A. J., Meyers J. E., Kalmbach J. B., et al. (2024) AJ 167 86

1. *Learning Spectral Templates for Photometric Redshift Estimation from Broadband Photometry*  
Crenshaw J. F., Connolly A. J. (2020) AJ 160 191

#### Co-Author with Major Contributions:

9. *Photometric Redshift Estimation for Rubin Observatory Data Preview 1 with Redshift Assessment Infrastructure Layers (RAIL)*  
Zhang T., Charles E., Crenshaw J. F., Schmidt S. J., et al. (2025) arXiv:2510.07370
8. *Redshift Assessment Infrastructure Layers (RAIL): Rubin-era photometric redshift stress-testing and at-scale production*  
The RAIL Team, including Crenshaw J. F. (2025) arXiv:2505.02928
7. *RTN-095: The Vera C. Rubin Observatory Data Preview 1*  
NSF-DOE Vera C. Rubin Observatory Team, including Crenshaw J. F. (2025) Rubin Obs. Tech. Rep.
6. *Impact of survey spatial variability on galaxy redshift distributions and the cosmological  $3 \times 2$ -point statistics for the Rubin Legacy Survey of Space and Time (LSST)*  
Hang Q., Joachimi B., Charles E., Crenshaw J. F., et al. (2024) MNRAS 535 2970
5. *The Active Optics System on the Vera C. Rubin Observatory: Optimal Control of Degeneracy among the Large Number of Degrees of Freedom*  
Megias Homar G., Kahn S. M., Meyers J. M., Crenshaw J. F., et al. (2024) ApJ 974 108
4. *Improving Photometric Redshift Estimates with Training Sample Augmentation*  
Moskowitz I., Gawiser E., Crenshaw J. F., Andrews B. H., et al. (2024) ApJ 967 L6
3. *The simulated catalogue of optical transients and correlated hosts (SCOTCH)*  
Lokken M., Gagliano A., Narayan G., et al., including Crenshaw J. F. (2023) MNRAS 520 2887
2. *The Sensitivity of GPz Estimates of Photo-z Posterior PDFs to Realistically Complex Training Set Imperfections*  
Stylianou N., Malz A. I., Hatfield P., Crenshaw J. F., et al. (2022) PASP 134 044501
1. *An information-based metric for observing strategy optimization, demonstrated in the context of photometric redshifts with applications to cosmology*  
Malz A. I., Lanusse F., Crenshaw J. F., Graham M. L. (2021) arXiv:2104.08229

#### Other Co-Author Papers:

1. *Photometric Redshifts in JWST Deep Fields: A Pixel-Based Alternative with DeepDISC*  
Merz G., Zhuang M., Li J., et al., including Crenshaw J. F. (2025) arXiv:2510.27032

#### Students Mentored

---

##### Graduate Students:

|                                            |                |
|--------------------------------------------|----------------|
| Ben Sherwin, Stanford University           | 2025 – present |
| Maya Redden, Stanford University           | 2025 – present |
| Zhuoqi (Jackie) Zhang, Stanford University | 2025 – present |
| Linda Jin, University of Washington        | 2025 – present |
| Hurum Tohfa, University of Washington      | 2024 – present |

##### Undergraduate Students:

|                                           |             |
|-------------------------------------------|-------------|
| Dominik Riemann, University of Washington | 2022 – 2024 |
|-------------------------------------------|-------------|

## Software

---

- PZFlow: Creator and lead developer of a Python package for efficient, high-dimensional probabilistic modeling of tabular data using normalizing flows.  
- PhotErr: Creator and lead developer of a Python package for estimating photometric errors for astronomical imaging surveys, including the Rubin, Euclid, and Roman observatories.  
- ts-wep: Contributing developer of a Python package for wave-front inference for the active optics system of the Rubin Observatory. 
- RAIL: Contributing developer of the RAIL photometric redshift (photo-z) estimation pipeline, including forward modeling galaxy catalogs and sources of systematic error.  

## Selected Presentations
